

KROSS CETANE BOOSTER

Increase the cetane number of low octane fuels or for use in engines with higher cetane requirements.

APPLICATION

All diesel engines.

FEATURES

Improve combustibility of the fuel. Increases the cetane number of the diesel fuel by up to 5 points. Especially recommended for lower quality fuels. Powerful and clean combustion and improved engine performance. Less exhaust gas and soot emissions, improved cold starting properties and smoother engine running. Reduces fuel consumption.

TECHNICAL PROPERTIES

Physical state	liquid
Colour	colourless
Odour	characteristic
Relative density [g.cm-3]	0,967
Flash Point [°C]	> 76

Specification variations in these characteristics may occur.
