

## KROSS LIQUID GREASE SPRAY

Lubricates parts working under extreme and shock loads and vibrations. Quick evaporation of solvent, therefore immediately strong adhesion to metal.

### APPLICATION

Thoroughly clean parts. Shake can well before use. Spray onto point of lubrication, leave to work for a short period, then spray again.

### FEATURES

- Silicon, resin and acid-free.
- High pressure and temperature resistance.
- Spray and salt-water resistant adhesive lubricant.
- Strong adhesion ensures good stability against all external influences.
- Penetrates even into hard-to-reach places.
- High dampening properties.
- Safe lubrication thanks to use of state-of-the-art wear resistant additives.

### TECHNICAL PROPERTIES

Colour	brown
Odour	characteristic
Density at 20°C	0,829 g/cm <sup>3</sup>
Flash point	-80 °C
Temperature range	-30 +150°C
Flowtime (4mmFordbeaker,25°C)	12 s
